DYNAMIC ANTIBACTERIAL ACTIVE MASK

- Medical grade mask
- Breathable hypoallergenic
- Destroys 99.999% of germs on contact
- Next generation technology inside
- Has been proven to be effective against human **corona virus***

The **Qlearon Q99** surgical mask is the most effective anti-microbial mask in the market, eliminating germs within minutes of contact and filtering air pollutants to ensure preservation of health and **reduction of the spread of pandemics**.

The **Qlearon Q99** face masks are made out of soft, gentle, hypoallergenic and breathable fabrics for optimal comfort for facial skin. The mask was especially designed in an ample shape to enable maximum ease of breathing, reduced skin irritation and comfort.

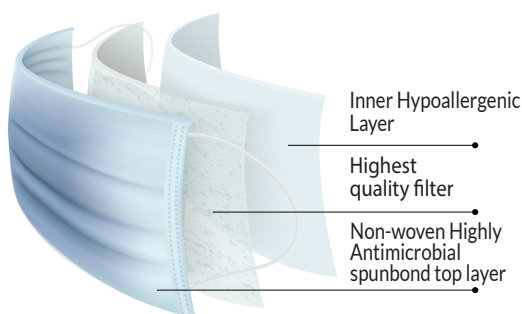

The multiuse **Qlearon Q99** mask is the preferred mask for surgical and medical staff worldwide and it is the trusted mask of choice by covid-19 testers. It is also preferred by vast numbers of consumers around the world who take their personal and family's health seriously and want to **contribute to reducing the spread of pandemics on wearing only the safest antimicrobial mask**.

Advantages

- Destroys 99.999% of Germs on contact.
- Contains technology effective against **corona virus***.
- Neutralizes 98% of airborne particles.
- Approved by the Israeli Ministry of Health.
- Highest-quality filter for optimal safety.
- Non-Woven fabric for maximum protection.
- Soft and breathable fabric for optimal comfort.
- ISO 10-10993 Certified. (Irritation & Skin Sensitization compatibility).
- Aluminum strip above nose. Soft and strong ear loops.
- Technology Pending FDA & CE approval.
- Cost effective solution: using 1 **Q99** mask can replace using of at least 10 regular face masks.

Uses

- Suitable for daily and **Multiple use**.
- Highly polluted or infected areas
- Protection against exposure to airborne particles.
- All surgical or medical environments
- Laboratory work that includes exposure to various contaminants.
- Dentistry and orthodontic procedures.
- Significantly contribute to the reduction of the spread of Pandemics

HOW DOES THE ANTI GERMS QLEARON Q99 WORK?

The anti bacterial mask has the effect of eliminating germs on contact and destroying the microbes once they reach the mask. The patented antimicrobial effect in the mask is permanent and therefore germs can be eliminated upon contact constantly, even after multiple uses.

The **QLEARON Q99** mask is covered with sub-micron material, which destroys germs on contact upon reaching the mask, by generating an electrostatic interactions which disrupt the germs' membranes and kills them on the spot.

The novel revolutionary structure of this material ensures the long-lasting antimicrobial activity of the mask. The material is designed not to release toxic components and acquires high chemical stability over the lifetime of the disposable face mask.
