SN300 Nitrile Gloves

Premium nitrile, powder-free, examination gloves, with extra thinness for unrestricted tactile sensitivity

SN300 Nitrile Gloves

The SN300 non-sterile nitrile gloves are produced with extra thinness for unrestricted tactile sensitivity as well as efficiency and agility. The extra thinness of these gloves allows the best comfort and, feel and fit. These features along with the high quality allow these gloves to officiate a variety of clinical procedures as palpating veins and starting IVs and a variety of other delicate procedures.

Applications

- Medical examination. Wearing SN300 gloves prevent contamination between the patient and the examiner.
- Dental treatment. Wearing SN300 gloves prevent contamination between the patient and the dentist.
- Food handling. Wearing SN300 gloves prevent chemical substances from migrating from the food contact material to the food.
- General Industrial applications. Wearing SN300 gloves in fields such as automotive, chemical, safety, sanitation, beauty, etc. prevents workers from direct contact with chemicals and polluting or toxic substances.
